

The Automatic Sliding Door system manufactured by Modifero Ltd conforms with the requirements of the European regulations. The system is approved by the TUV Austria Turk. It complies with the ECE Type Approval E24 and obtained the certificate of compliance No 10R-05 2797 and EMI (Electro Magnetic Interference) certificate of compliance No AB-387T-EMC352-0116

OPERATION INSTRUCTIONS

The sliding door is operated by a push-button located on the dashboard and by the remote controller.

- 1. Opening and closing the door:** Press the push-button or remote controller once to open the door. Press again to close the door completely
- 2. Changing the direction during movement:** If you press the control button while the door is moving, the door will immediately reverse the direction.
- 3. Midway stop function:** The door can be stopped at any position if the feature is activated. Hold the button during closing until you hear one beep to activate, two beeps to deactivate.
- 4. Visual indicator (LED):** The LED inside the push button lights up while the door is opening.
- 5. Audio indicator (Buzzer):** The system includes an acoustic warning buzzer that sounds while the door is moving. This feature helps warn nearby passengers and improves operational safety.

The buzzer sound can be enabled or disabled using the remote controller.

a. Disable the Buzzer Sound:

- a. Press and hold the door opening button on the remote controller.
- b. Keep holding the button while the door closes completely.
- c. When you hear one beep, release the button.

Now The buzzer sound is now **disabled**.

b. Enable the Buzzer Sound Again:

- a. Press and hold the door opening button on the remote controller.
- b. Keep holding the button while the door closes completely.
- c. When you hear two beeps, release the button.

The buzzer sound is now **enabled**.

Safety Recommendation: For maximum operational safety, we recommend keeping the buzzer function enabled during normal vehicle use.

- 6. Soft stop feature:** The door slows down and stops smoothly at the end of travel thanks to the integrated sensor system.
- 7. Safety Notes:**
 - a. Do not obstruct the door movement path.
 - b. Keep hands and objects away from moving parts.
 - c. Children should operate the system only under supervision.
 - d. If abnormal noise or resistance occurs, stop operation and contact service.
