

Ford Transit  
(2014-Recent)

Installation guide for  
“operating the door by  
pulling the outside handle  
feature”

Picture 1

Picture 2

Picture 1 shows the opening switch from the handle, remove the wire on the bottom carrier leg of the sliding door and pull it into the door.

Firstly, insert the empty cable into the slot indicated by the black arrow, then install the inner wire to the switch spring as shown by the red arrow.

Connect the RF transmitter control cables to the terminals on the switch.

Picture 2 is a visual of Fiat Ducato. It should also be mounted in this way for Ford Transit.
